PROFILE

I'm Nget Sophun, a Computer Science student at the Royal University of Phnom Penh and a mobile developer. Passionate about building innovative applications, I enjoy learning new technologies, solving complex problems, and exploring AI and robotics to continuously expand my skills.

SKILLS

- MVC/MVVM Architecture & Design Patterns
- Firebase Authentication & Cloud Services
- Java, Kotlin, Jetpack Compose
- RESTful APIs & JSON
- Flutter & Dart
- Backend Development (Node.js, Express.js, Laravel, Spring boot)
- MySQL & SQL Server
- State Management (BLoC, GetX, Riverpod)
- Git, GitHub, GitLab & Trello
- Robotics & Internet of Things (IoT)
- Agile Development Methodologies
- Google Maps & WebSocket Integration
- Flutter Package Development
- Android & iOS App Deployment
- Deploy App to PlayStore, App Store
- Teamwork, Communication & Time Management

LANGUAGES

- Khmer (Fluent)
- English (Intermediate)

WORK EXPERIENCE

Canada Bank

2025 - PRESENT

Properties Evaluation System (PEDS)

- Developed a cross-platform property evaluation application using Flutter.
- Implemented Google Maps with custom markers, polygons, and GPS tracking.
- Integrated REST APIs for property data management.
- Built property inspection, valuation, and reporting modules.
- Optimized application performance and enhanced user experience.
- Collaborated with cross-functional teams in an Agile environment.

Center of Excellent (COE) App

- Application Maintenance, Support and Feature Enhancement.
- Fixed bugs and improved application stability.

Customer Feedback App

- Maintained, supported, and enhanced the web application.

Canada Bank Internal Message (CNB-IM)

- Developed a chat application using polling for near real-time messaging.
- Optimized application performance and enhanced user experience.

Turbotech

2024 - 2025

Merchant App

- Developed and maintained Flutter application features.
- Designed application architecture and user interfaces.
- Integrated RESTful APIs and local storage.
- Built responsive layouts for mobile phones and tablets.
- Fixed bugs and implemented push notification features.

Smart GPS App

- Developed a Flutter-based GPS tracking application.
- Implemented Google Maps and RESTful API integration.
- Designed and developed responsive user interfaces.

Red Ant App

- Developed Flutter features for an e-commerce application.
- Designed and implemented responsive user interfaces.
- Worked closely with the team to deliver new features.
- Integrated RESTful APIs and Fixed bugs and improved application performance.

Driver App

- Developed a real-time driver tracking application.
- Designed and implemented the user interface.
- Integrated RESTful APIs and push notifications.

Blue Technology

2023

Internship Mobile App

- Developed a Point of Sale (POS) application using Java (Android Native).
- Applied the MVC architectural pattern.
- Designed application screens and architecture.
- Integrated Room Database for local data storage.

E-Robot

2021 - 2023

- Team Leader Robotic and Lead Project STEM for Youth.
- Developed a mobile application for controlling robots.
- Built robots for exhibitions, competitions, and demonstrations.
- Developed IoT applications to control robots using mobile devices.
- Integrated AI features including hand gesture, voice, and face recognition.
- Collaborated on robotics research and development projects.
